Intercourse																																													
cervix high\low open\close soft\firm																																													
secretion sign																																													
cervical secretion secretion description texture, sensation spot, scent, taste color																																													
internal\external																																													
secondary fertility signs aches, moods, bloating cravings, fatigue sexual desire																																													
miscellaneous special events, illness travel, stress, meds																																													
fertility window																																													

Name _____
 fertility chart # _____
 Date _____
 present cycle _____
 shortest cycle _____
 longest cycle _____

Secretions signs **Vaginal sensation**

B
bleeding

spots watery\dry

D
dryness dry
nothing

N
non fertile dry\sticky
acidic, thick, sticky dry, pasty crumbly

(F)
fertile watery\wet
milky, creamy, watery, lotion, smooth, wet

(V)
very fertile wet
wet, slippery, egg white, glossy, neutral
